

The CASE Center for Excellence in Educational Leadership presents

CASE eLearning Webinar Series Technology in Education

ALL
NEW!

Are Your Students and Staff Technologically Literate for the 21st Century?

Complimentary for CASE Members

Facilitator: John Canuel, Executive Director of Education Technology
Jeffco Public Schools

No Child Left Behind requires that all students, staff and administrators demonstrate that they are technologically literate. CDE will begin assessing teacher technology proficiency this year. Being technologically literate requires more than just knowing how to “do and use” technology. Participants will learn about the ISTE National Educational Technology Standards for Students, Staff and Administrators which will provide information and rubrics to assess, monitor and set goals for school personnel, individually and within teams.

John Canuel is the Executive Director of Educational Technology Services in Jeffco and has presented at the CASE Annual Conference, Technology in Education Conference, International Society of Technology Education, and the National School Board Association Conference. He is charged with providing leadership and support for libraries and the use of technology in Jefferson County's 150 schools.

Registration

Member fee: Complimentary
